DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-9, and 15-19, drawn to material for forming a thin film.

Group II, claim(s) 10-12, and 20, drawn to method of preparing a material.

Group III, claim(s) 13-14, drawn to method of preparing a thin film.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature is a conductive thin film comprising a mixture of two different fractions of a functional polymer. This element cannot be a special technical feature under PCT Rule 13.2 because the element is shown in the prior art. EP 1,081,548 A1 teaches a thin film coating of an electrically conductive polymer comprising a first fraction of a first polymer, thiophene, in a second polymer, the organic solvent. Since the common technical feature is known in the art, there is a lack of unity a posteriori, since the exposure mask characterized by the ratio of light blocking patterns and transmissive patterns is not a contribution over the prior art.

3. Because these inventions have a different unity of invention for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art due to their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Marc Wefers on 10/27/2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
